

Dr. Madeline Niziak grew up in Needham, MA and aspired to be a dentist from a young age. She received a Bachelor of Science degree from the Commonwealth Honors College at UMass Amherst, graduating with Cum Laude Latin Honors. Dr. N then began her dental career as a dental assistant in general dentistry and periodontics offices, gaining experience in family and cosmetic dentistry, periodontal surgeries, and implant dentistry. After her two years as an assistant, she attended Tufts University School of Dental Medicine, obtaining her Doctorate of Dental Medicine. Throughout her time in dental school, she enjoyed cosmetic and functional dentistry, prosthodontics, and most importantly, developing meaningful and trusting relationships with her patients.

Dr. N continues to broaden her knowledge by attending continuing education courses on the newest dental technologies and techniques and has plans to pursue aspects of sports dentistry and forensic dentistry. She stays on top of the latest and most important dental news and topics as a member of the American Dental Association and Massachusetts Dental Society.

During her free time, she spends her weekends finding and enjoying new spots near Davis Square, where she resides. Dr. N also relaxes by spending time with friends, reading crime novels, and cheering on the Patriots. Go Pats!
